This document contains a collection and analysis of training requirements from the MORPHEUS industry partners.

The assessment of industry needs for training is the basis for specification new training courses or extension of existing courses for undergraduate students and experienced engineers. The goal is to improve the knowledge of students but also of experienced engineers concerning a heterogeneous reconfigurable SoC – the MORPHEUS platform - as a novel platform for system design. Also included is a list and summary of existing and new training offers from the academic partners to have a first view on what courses are feasible and which ones have to be defined new. The final specification and course preparation is the next step within the MORPHEUS project after analysis of the industrial requirements for training.
